SUMMARY

I am a Data Analyst & AI Solutions Builder with a strong Computer Science foundation and hands-on experience in data analytics, machine learning, and dashboard development. I excel in using Python, SQL, and Power BI to turn raw data into actionable insights, helping businesses make informed decisions. My focus is on delivering practical data-driven solutions for both clients and personal projects.

EXPERIENCE

Data Analyst

Freelance Data Analyst

01/2022 - Present Remote

Providing data analytics and AI solutions to various clients, focusing on actionable insights.

- Improved retention strategies, reducing customer churn by {XX%}, through predictive machine learning models.
- Developed interactive dashboards using Power BI to visualize sales and business performance.
- Cleaned and transformed raw datasets into structured formats for analysis.
- Automated data workflows using Python, improving efficiency and accuracy.

EDUCATION

Data Science Program

ALX Africa

01/2026 - 12/2026 Remote

Data Analytics

ALX Africa

01/2025 - 12/2025 Remote

Degree of Computer Science

Haramaya University

2015 - 2018 Haramaya

CERTIFICATIONS

ALX Data Science Program

Completed a 13-month intensive Data Science program with ALX Africa, focusing on real-world problem solving using data. Data analysis and visualization Machine learning model development Data cleaning and transformation Business-focused insights and decision support

Built practical projects including customer analytics, predictive modeling, and interactive dashboards designed to solve real business challenges.

Machine Learning Certificate

Certificate in Machine Learning from ALX Africa, covering various algorithms and practical applications in data science.

Data Analytics Certificate

Comprehensive training in data analysis techniques and tools, emphasizing practical implementations.

STRENGTHS

Detail-Oriented

Attention to detail in data cleaning and processing.

Analytical Thinker

Strong problem-solving abilities to address complex business challenges.

Effective Communicator

Effective communication skills in presenting data insights.

KEY ACHIEVEMENTS

Customer Churn Prediction Model

Successfully built a customer churn prediction model leading to a 15% increase in customer retention.

Sales Performance Dashboard

Created an interactive sales dashboard that enhanced visibility into product performance, aiding executive decision-making.

SKILLS

Hard Skills

Data Analysis

Python

Machine Learning

Data Visualization

Power BI

INTERESTS

Data Storytelling Enthusiast

I am passionate about exploring new data visualization techniques and presenting findings in an engaging way.

Hackathon Enthusiast

I enjoy participating in hackathons to solve real-world problems through innovative data solutions.

PROJECTS

Customer Churn Prediction

📅 01/2023 - 03/2023 📍 Remote

Customer churn prediction model aimed at enhancing customer retention strategies.

- Built predictive model using Python and Scikit-learn.
- Identified high-risk customers based on behavior patterns.
- Provided insights to support retention strategies.

Sales Dashboard

📅 04/2023 - 06/2023 📍 Remote

Sales dashboard project using Power BI to help stakeholders visualize business performance.

- Designed dashboard to track sales trends and performance.
- Visualized key metrics including revenue and product performance.
- Enabled data-driven decision-making.

Patient Segmentation

📅 07/2023 - 09/2023 📍 Remote

Unsupervised learning project focusing on patient segmentation for healthcare improvement.

- Applied clustering techniques to segment patients.
- Identified unique patterns for targeted analysis.
- Presented insights using visual dashboards.
